

Please do NOT let cable companies set the rules for high speed internet/broadband. I DO NOT favor allowing these companies to provide high speed internet/broadband at all, as this seems a tremendous conflict of interest and attempt to create media consolidation in the hands of a few wealthy people who already have too much control of our media. I would like you to recind all HSI/broadband licenses to the cable companies who already provide HS internet/broadband, especially Comcast who has proven that it will betray the public trust in order to make as much money as possible. HSI/broadband should be provided by our municipalities so that it is affordable for most families. Federal, state and local government should control internet access, not for-profit corporations. Thanks!
